

Internet Security 2009

Maximum protection against all kinds of Internet threats

Panda Internet Security 2009 is a security suite that lets you use the Internet with complete peace of mind. It protects you from viruses, spyware, rootkits, hackers, online fraud, identity theft and all other Internet threats.

The anti-spam engine will keep your inbox free from junk mail while the Parental Control feature ensures your children can use the Web safely. And thanks to the new **Collective Intelligence technology**, the solution is now much faster than previous versions.

Maximum protection with minimum impact on your PC

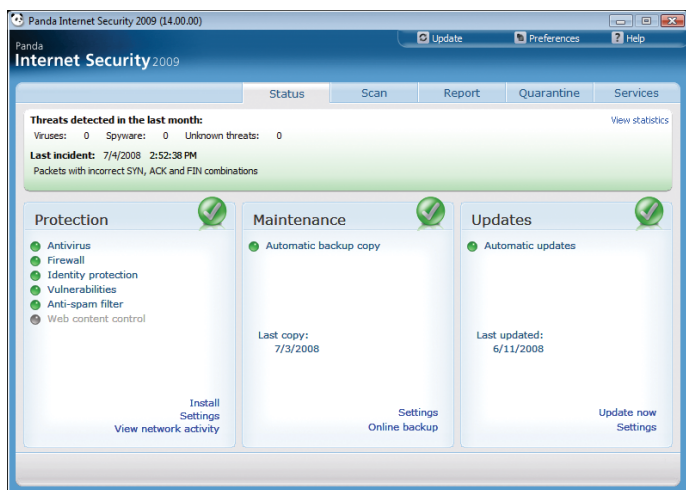

Traditional antivirus cannot protect you against today's threats, but Panda Security is always one step ahead, protecting users against the very latest cyber-criminal attacks. Our new 2009 solutions are based on the Collective Intelligence model, **the most innovative online security technologies** to protect you against malware and identity theft.

How do Panda Customers benefit from "Collective Intelligence":

- **Maximum detection** against all threats by "scanning from the cloud" and using correlation and statistical algorithms.
- **Minimum PC resource consumption.** Panda 2009 products have been re-designed from the ground up to consume as little memory as possible and to improve the overall performance of your PC.
 - ✓ Scanning from the cloud technology reduces the memory impact in your PC.
 - ✓ White-listing technology recognizes known good files and improves scanning speed.

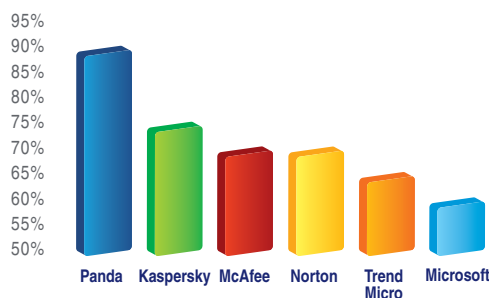

- Anti-Malware Protection
- Identity Theft Protection
- Safe Internet Browsing

- Anti-Virus
- Anti-Spyware
- Anti-Phishing
- Anti-Rootkit
- Firewall
