

Why Choose LabTech® 

REASON #

1

If You Can Think It, LabTech Can Automate It.

Imagine a world where you can be in **more than one place at a time**; a world where you can touch all of your **managed endpoints** from the comfort of your office—or anywhere you have Internet access—with the click of a mouse. **LabTech makes this world a reality with the most powerful automation engine available on the market.**

What Makes LabTech's Scripting Engine So Unique?

The Most Automation Out-of-the-Box

Feel like a long-time scripting expert armed with more than 400 scripts, 70 system commands and over 200 contextual right-click actions out-of-the-box with LabTech Ignite®, an IT industry exclusive built directly into LabTech.

Automate Everything

Besides more built-in functionality than competing RMM solutions, LabTech lets you automate any repetitive IT task imaginable.

Easy to Learn

Easily follow the simple functions-based script engine, which uses a simple linear approach, similar to standard batch programming, with the added benefit of being able to use basic if/then logic. There is no programming language to learn; just jump in and start creating your automation.

Create Automation Faster

LabTech has the tools you need to create powerful automation quickly and easily. From the most basic to the most complex tasks, LabTech enables you to:

- Automatically create scripts from any of the right-click command actions
- Easily copy and paste script lines or steps
- Use variable replacements to hold and insert data
- Call frequently used script functions into other scripts as needed
- Quickly locate scripts using the search function

Native PowerShell Integration

Copy and paste any PowerShell script and easily use those scripts across multiple domains, system types and configurations without having to individualize each PowerShell script. To top it off, there is no need to use patching to install PowerShell on the systems you're working on, so your automation can start right away.

With the Automation Power of LabTech, you can:

- ⚙ Automate time consuming, repetitive maintenance tasks
- ⚙ Complete labor intensive tasks
- ⚙ Automatically detect and remediate common issues
- ⚙ Demonstrate value by tracking automation hours and reporting it to your clients
- ⚙ Manage more endpoints per technician
- ⚙ Deliver consistent, reliable results every time
