Why Choose LabTech[®]

Multitasking Has Never Been Easier.

We know client computers don't break one at a time. Well, maybe they do in a perfect world, but here in the real world, you get bombarded by multiple requests from multiple clients every day, and they all expect priority treatment. Wouldn't it be great if you could work on all of these issues at the same time? With LabTech, you can!

Work on Multiple Machines at the Same Time

The days of navigating back and forth through a sea of webpages are over! If you're still using a remote monitoring and management (RMM) solution that allows you to focus on only one task or function at a time, it's time to look at LabTech.

Oftentimes, in order to resolve some of today's complex IT issues, you need to look at more than just a single system or device. But if you have to wade your way through a sea of webpages to switch back and forth between multiple endpoints or reports, it's all too easy to miss something, misdiagnose or worse. LabTech makes it easy to work on multiple servers, workstations and even network devices at the same time—natively, with no third-party software needed. Plus, LabTech's background remediation capabilities make it even easier to work on multiple machines without having multiple VNC or RDP windows open.

Why Multitask?

- Increase technician efficiency
- Boost productivity
- Decrease troubleshooting time
- Decrease problem-resolution time

Want to see it for yourself? Get your **FREE LabTech trial** today at www.bluesolutions.co.uk/vendors/labtech/free-trial or call **0118 9898 222** to schedule a live demo.
