

# BITDEFENDER

## Security for Virtualised Environments

### REDUCE COSTS

Secure greater numbers of virtualised data centre services (inc. persistent & non-persistent VDIs) at lower cost.

### SECURE MORE

Easily extend security to customers' virtual, physical and cloud estates.

### FAST & EFFICIENT

Ensure the security you deliver is fast and scalable enough to give a real boost to your operational efficiency.

### BLUE SOLUTIONS MSP PARTNER PORTAL

Achieve maximum productivity with minimum overheads whether you're at your desk or on your mobile.

## More Efficient Virtualised Security For Less

GravityZone Security for Virtualised Environments for MSPs is a low-profile enterprise solution for your virtualisation, data centre and cloud customers.

It can enable you to secure **35% more VDIs per host, with a 17% increase in response speed.**

- ✓ Integrated with GravityZone next-gen layered security architecture, for protection across every security layer, even against zero-day attacks and unknown threats.
- ✓ Eliminates single points of failure and bottlenecks while providing unparalleled antimalware protection.
- ✓ One single console means:
  - Easy to manage and to grow – gives total security control and easily enables you to add and upsell other services, too!
  - Minimal administration overhead - easy, centralised management, deployment and enforcement of security policies, to any number of endpoints
- ✓ Extensive performance testing proves that SVE has the **lowest** performance impact of all major AV solutions on the market:
  - Reclaim up to 17% of your host's computing power
  - Reduce latency compared to your current AV solution
  - Cut operational cost due to a radical reduction in maintenance and monitoring
- ✓ Platform agnostic, includes VMware, Citrix, Microsoft Hyper-V, KVM, Oracle, and others.
- ✓ Protects virtual machines running Microsoft and major Linux distributions

### Higher VM density & faster application response times

Over 85% of administrators who evaluate the Bitdefender SVE solution recommend a purchase
