

BitTitan MigrationWiz

Cost-effective, highly scalable self-service migration solutions

MigrationWiz provides on-demand data migration services through a fully automated, cloud-based solution that can be accessed at any time, from anywhere to conduct a seamless mailbox, public folder, archive, or data migration on demand. Without the inconvenience of additional hardware or software to install, this patent pending technology has met the needs of global Fortune 500 organizations, governments, healthcare providers and individuals in over 100 countries. This software as a service (SaaS) solution allows customers to sign-up, configure and initiate a migration in a matter of minutes, with no prior experience or training needed.

Easy to Use

Simple and effective migration solution. Sign up, configure, purchase and submit migrations in minutes with no prior experience or training required.

Cost-Effective

MigrationWiz lowers the total cost of migration for any business, regardless of size. Fixed pricing simplifies planning, and we offer a tiered discount structure based on the number of licenses purchased.

First-Class Support

Our knowledgeable support staff is available twenty-four hours a day, seven days a week, free of charge, to assist you with your migrations.

Faster Migrations

Decrease your migration times. Our patent pending technology has moved hundreds of terabytes of data in under 48 hours.

24/7 Self-Service

Configure and start migrations twenty-four hours a day, seven days a week, anytime, anywhere.

Trusted Brand

MigrationWiz is used in over 100 countries. Our worldwide migration farm is used by single person companies to globally recognized Fortune 500 organizations.

Zero Deployment

No software to download or install. No hardware to deploy. Our zero deployment solution is hosted in a state of the art data center. Don't risk deploying unnecessary elements that can compromise the integrity of your internal network.

Secure

Automated migrations eliminate the need for human interaction with your data — providing secure communication through SAS 70/PCI environments.

Unlimited Scalability

MigrationWiz supports hundreds of thousands of simultaneous migrations at any given time. Migrate more data daily and shorten your timeframe. Don't be bottlenecked by worker throughput with other solutions.

Scripting and Integration

Our platform can be fully scripted using PowerShell. Automate the entire migration process. In addition we offer SOAP web services for custom integration.

21st Century Migration Solution

Unlike other legacy migration solutions, MigrationWiz was built from the ground up to move mailboxes and other data to and from hosted environments. Network communication is optimized for minimal network chatter and resource usage.

MigrationWiz is a complete cloud-based migration solution – zero deployment, easy to use, self-service, and unmatched functionality.

Choose the Right Tool for Your Migration Project

MigrationWiz is an extremely versatile software as a service, providing a wide array of migration options and features that make it the premier data migration product on the market. Migrating everything from mailboxes to documents to public folders to archives, MigrationWiz is the most complete migration solution available.

Migrate Mailboxes

MigrationWiz has long been regarded as the premier option for email migration, with the ability to migrate to and from loads of platforms, including but not limited to Office 365, Exchange 2003+, Zimbra, Lotus Notes, and Gmail. BitTitan Email Migration is done entirely through our web-portal, so there's no hardware or software for our users to worry about, and no intrusive outside personnel coming into the workplace. Best of all, MigrationWiz is designed to completely eliminate system downtime and lost user productivity from the migration process.

Migrate Public Folders

Traditionally a manual process, you can now automate your public folder migrations too. With BitTitan Public Folder Migration, you can easily migrate all your shared contacts, calendars, mail folders, and other extras as simply and inexpensively as if they were ordinary user mailboxes, saving you endless time and frustration.

Migrate File Storage Repositories

Need to migrate documents? No problem. Use the BitTitan Document Migration function within MigrationWiz to move all your data, including the complete folder hierarchy, from Google Drive to OneDrive for Business, vice versa or any combination thereof.

Configure the Desktop for O365

BitTitan DeploymentPro works to configure and integrate your existing Outlook platform with Office 365 to keep everything running smoothly for you and your users after your migration. No need to manually update every single workstation one by one or incur the expenses and inconveniences associated with old-school, manual methodology. Simply select a few basic options, and DeploymentPro takes care of the rest - automatically.

Archive Migration

MigrationWiz can also migrate Archives and PST files to your new mailbox or archiving system. Archiving is essential for any business, both for compliance and reference reasons, but has traditionally been costly, difficult, and time-consuming. Leveraging the power of BitTitan Archive Migration, you can streamline the process and reduce costs. By interacting with PST files, Archive Migration can now migrate the archives of almost any messaging system, even those not supported by migration solutions. Additionally, old or unused mailbox archives can be migrated to Amazon S3 (Simple Storage System) for cost-effective storage.
