

End-to-End Office 365 Onboarding Solution

UserActivation for Office 365 Partners automates the entire process of moving new customers to the cloud, saving time, effort, and money. An intuitive web-based wizard will guide you through the configuration options. Once you select your customization preferences, BitTitan's automation technology completes the entire onboarding process for you.

UserActivation for Office 365 is an automated onboarding solution that allows for SMBs to make a seamless transition to Microsoft Office 365.

“Useractivation has transformed the way in which we manage and execute our customer’s office365 migrations... No more delays and lost weekends!”

—JOE MARKERT, MANAGING DIRECTOR, FUNCTIONONE

Easy to Use

The simple web interface guides users with limited IT knowledge through the entire activation process. The solution's simplicity allows you to serve clients that previously could not afford expensive migration consulting.

Fixed Cost

Fixed pricing simplifies planning, enabling you to provide your customers with a flat fee for their activation project and ensures no surprises.

First-Class Support

Our knowledgeable support staff is available twenty-four hours a day, seven days a week, free of charge, to assist you with activation projects.

No Network Disruption

The configuration and data migration run as background processes during the activation project and will not affect your client's daily operations with their existing messaging system.

Custom Migration Plan

Based on the information provided and the tasks that are chosen for automation, UserActivation will create a migration plan specific to your client's activation project.

Data Migration

Projects can include data migration using our trusted migration product, MigrationWiz, to move emails, calendars, and contacts to Office 365.

Partner of Record

Input your Microsoft Partner information during configuration, allowing you to receive a commission on all of your customers' purchased subscriptions.

Automatic Outlook Configuration

UserActivation includes BitTitan's DeploymentPro for automated outlook configuration.

DeploymentPro configures each user's existing outlook profile for Office 365, ensuring maximum continuity.

Trusted Brand

BitTitan is globally recognized for its products that include MigrationWiz, DeploymentPro, SmtplLogic and UserActivation. To learn more about BitTitan's suite of products visit www.BitTitan.com.
