LIBRAESVA
EMAIL SECURITY

LIBRAESVA FOR OFFICE 365™

Libraesva offers a solution service that protects
all of your business email in Office 365™ with zero impact
on email performance.

INNOVATIVE TECHNOLOGIES AND MULTI-LAYER ENGINE

Libraesva Email Security Gateway completes Office 365™ protection
by using Innovative Technologies and a multi-layered engine.

MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE

Libraesva analyses the behaviour of every email by using machine learning
and artificial intelligence algorithms, actively blocking BEC threats.

SUPERIOR TRACKING AND VISIBILITY

Comprehensive tracking functionalities and one-click full disclosure
of all security checks, centralised view and full traffic analysis.

EMAIL CONTINUITY

In the event of an Office 365 outage, we keep your email flowing.

THREAT ANALYSIS PORTAL

Extend Office 365™ eporting with the Libraesva Threat Analysis Portal,
providing information such as; geo-localisation of malicious domains,
percentage of emails blocked, trends on the number of dangerous links,
details about documents analysed by the Sandboxes and threats targeting
your organisation.

MICROSOFT® OFFICE 365™ SECURITY WEAKNESSES

Do you think that Office 365™ is enough to protect your emails against attacks?

EMAIL PROTECTION BY OFFICE 365™?

Office 365™ proposes two levels of email security, called Exchange Online Protection (EOP) and Advanced Threat Protection (ATP). Both fail in stopping new advanced threats:

- EOP does not detect phishing and spear-phishing attacks, "Safe Links" feature is not available at all.

- EOP has no advanced threat protection for documents to remove active content and other potentially malicious components.

- ATP "Safe Links" feature is unsafe and vulnerable to many evasion techniques as it relies on popular domains that are white-listed by Microsoft.

- EOP and ATP guarantee efficacy against all known threats, but are inefficient against new and evolving threats due to the technology they use.

- EOP and ATP are not able to disarm links and sanitise active code inside PDFs.

- ATP has no specific protection against business email compromise (BEC) attacks.

Office 365™ filtering is based on secret word lists and unknown reputation sources, generating a lot of false positives.

DEFEND YOUR OFFICE 365™ AGAINST EMAIL-BORN THREATS

01   Protection against spear phishing, account compromise and business fraud

02   Block ransomware, phishing and zero-day malware

03   Award winning spam filtering with up to 99,99 catch rate

04   Easy and quick to deploy, immediate protection

05   Office 365™ seamless integration and authentication

06   Outstanding Customer Support

07   Esvalabs collaborative feedback, driven by human intelligence
